

## Muhammad Yunus

MERN Stack Developer

DOB : AUGUST 15, 1995 (26 YEARS+)

### ABOUT ME

I am a MERN Stack Developer with concrete knowledge of vanilla JavaScript with the ability to build applications with both functional and object oriented approaches. I can build RESTful APIs with Node.js using MongoDB database following Model View Controller (MVC) architecture.

Besides, I have strong command on TypeScript which is the superset of JavaScript, that emits potential errors while compilation phase, protecting the apps from being crashed at runtime.

### GETTING IN TOUCH

📍 House: 29, Road: 06, Block: F,  
Banasree, Rampura, Dhaka-1219

📞 01928-566-200

### AREAS OF EXPERTISE

JavaScript

Node.js

MongoDB

MVC

TypeScript

React.js

Express

Firebase

Redux

RESTful APIs

Material UI

Bootstrap

Tailwind CSS

### TRAINING & COURSES (2 YEARS+)

#### UDEMY.COM - 1.3 YEARS

Here, I have spent over a year in order to level up my skills on JavaScript, TypeScript, React, Redux, Node.js, Data Structures & Algorithm courses with their premium subscription.

#### PROGRAMMING HERO - 6 MONTHS

I have learnt full stack MERN development on this platform during a period of almost six months.

#### CREATIVE IT INSTITUTE - 5 MONTHS

I had started my journey into the world of web with 'Responsive Web Design' course from this institute over two years ago and I had accomplished this with great success, Alhamdulillah.

### LANGUAGE PROFICIENCY

I have pretty strong command on English language with adequate fluency in speaking and advanced skills in reading, writing and listening.

### ACADEMIC EDUCATION

I'm yet to finish my Bachelor of Hon's in (English Language & Literature) from Uttara University. **My CGPA is 3.92 out of 4.0 till day.** However, I have put a break to my studies in order to pursue my career on programming.
